Symmons, Watts and
other hookups

Manual turn-on,
automatically shuts
off water supply
within 1 - 2.5 hours

Tested for
10,000 cycles

cUPC and
IAPMO approved

No wiring necessary,
new & existing
installation

INTRODUCING KEENEY'S PATENTED TIMEOUT™ AUTOMATIC TIMER VALVE.

TimeOut™ is an **automatic timer valve** that is manually activated and automatically shuts off the water supply to washing machine hoses. TimeOut™ eliminates pressure on hoses and prevents flooding in the case of a burst hose.

TIMEOUT™

AUTOMATIC SHUT OFF VALVE

INTERCHANGEABLE

TimeOut™ can be configured to fit standard washing machine boxes and is interchangeable with the following Symmons, Watts and other hookups:

* PART NO.	SYMMONS	WATTS
	W-400	2-M2
	W-400IPSC	2T-M2
	W-400IPSF	2-MC-SC
		2T-M2-SC

* Also interchangeable with other hookups

PART NO.	DESCRIPTION
2354	Valve without threaded brass inlet connectors
2354S2	Pair of two threaded brass inlet connectors
2354RBBX	Valve with threaded brass inlet connectors and outlet box

RETROFITTING WITH EASE

1. Turn off water supply leading to valve and remove washing machine hoses.
2. Loosen and remove bolts on top of valve that attach current valve body to shanks connected to water supply. Remove valve body from threaded brass inlet connectors.
3. Ensure that seals (o-rings or rubber washers) from old valve are in place on threaded brass inlet connectors and in good condition, replace if necessary.
4. Remove cover and place timer valve onto threaded brass inlet connectors. Tighten with supplied bolts making sure that the seals are in place under the bolt head. *Note: The use of longer bolts (supplied) may be necessary for certain brands.
5. Replace cover, attach handle extension, reattach washing machine hoses and turn on water supply, check for leaks.

U.S. Patent #6543480 | Canadian Patent #2415679
