**“ The adhesive gasket provides ease of installation for one man... ”**

*The fact that the Seal4Test is designed for a one person install is huge benefit to us because we do a large amount of multi-family installations. Also, the product is installer friendly given the labor pool available today. Not a lot of complicated small parts to lose or misplace on the job. Bottom line, it saves us time and money due to the simplicity and one person install.*

Double Adhesive Overflow Washer For One Man Installation

Clean Break Snap-Off Test Plug

One less glue joint

TAPERED DESIGN  
Drains faster & helps prevent standing water / mold

S4RKPVC6WS  
6" one piece waste shoe

**Description:**

Schedule 40 PVC/ABS bath drain and trim system. Installs to most standard tubs and tub/shower enclosures. Seal 4 Test is designed to simplify installation with its integrated, easy snap-off test plug, stylish push on faceplate, and unique overflow double sided adhesive gasket that allows for a 1 person installation.

**Features:**

- For residential/commercial bath fixtures requiring a stack test up to 4 stories
- Easy to remove test plug
- Low profile push on overflow faceplate, no tools required eliminating installation damage
- Easy one person installation
- Optional tapered one piece waste shoe available
- Ask about **50926W-1**: Thin overflow washer, for thicker wall tubs
